Sticky Knowledge: What is an Glockenspiel and how do you play it?

The glockenspiel is a stringed percussion instrument. It is similar to the xylophone (made out of wood), though its bars are made out of steel, and it plays notes that are much higher. To make a sound on the glockenspiel, the player must strike a bar with a beater. When the player strikes a bar with a hard beater, the glockenspiel produces a bright and sharp sound. When the player strikes a bar with a soft beater, a quieter sound is produced. You can play the ukulele standing up or sitting down.
